Voting Rights Legacy of the '60s Heads to Court as North Carolina Law Is Tested

(NY Times) Days after South Carolina confronted its past and lowered the Confederate battle flag, North Carolina will grapple with its present-day rules that determine access to the voting booth. A federal trial opening in Winston-Salem on Monday is meant to determine whether recent, sweeping changes in the state's election laws discriminate against black voters. These changes were adopted by the Republican-dominated state legislature in 2013, immediately after the United States Supreme Court struck down the heart of the Voting Rights Act of 1965 when it ended a requirement that nine states with histories of discrimination, including North Carolina, get federal approval before altering their election laws. But the case, as well as one involving a Texas law requiring voters to show a photo ID, could have far wider repercussions, legal experts say — helping to define the scope of voting rights protections across the country in the coming presidential election and beyond. The contested measures in North Carolina include reduced early voting days, an end to same-day registration and an end to a program to preregister high school students. They are a far cry from the violent intimidation and poll taxes of the Jim Crow era. Still, few issues are more highly charged than voting rights in the old Confederate states, where the murder of civil rights workers and the brutal police attack on Alabama marchers galvanized Congress to pass the 1965 act, and the trial is fanning old emotions.

Afghanistan's ISIL chief killed by US airstrikes: officials

(Al Jazeera) The top ISIL commander in Afghanistan has been killed by a U.S. air strike in the country's east, officials said on Saturday, the fourth former Taliban member who declared loyalty to the Middle East-based fighters to be assassinated within a week. Hafez Saeed was the leader of the Islamic State in Iraq and the Levant in Afghanistan and Pakistan, Afghanistan's National Directorate of Security (NDS) said. He was killed along with 30 other fighters as they gathered in Achin district of Nangarhar province late on Friday, the intelligence agency said. It gave no further details of the air strike. Two ISIL-affiliated commanders in Afghanistan who said they were present when the strike happened confirmed Saeed's death to Agence France-Presse. NATO ended its combat mission in Afghanistan in December, leaving local forces to battle the Taliban alone, but a residual force remains for training and counter-terrorism operations. Saeed, a Pakistani, was among a small but increasing number of senior Taliban fighters who have switched allegiance to ISIL, which has seized territory in Iraq and Syria and inspired attacks worldwide. The ISIL loyalists have been targets for U.S. drone strikes in Afghanistan, which have killed three other ISIL commanders in the same area in the past week, including top commanders Shahidullah Shahid and Gul Zaman. A spokesman for U.S. military in Afghanistan, Col. Brian Tribus, confirmed on Saturday that "U.S. Forces conducted a precision strike in Achin District, Nangarhar Province, on July 10 against individuals threatening the force."

SITUATION SUMMARY

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- No significant Weather Watches or Warnings are in effect.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Showers and thunderstorms will continue across the northwest California interior through the weekend due to a few disturbances. Activity will subside on Monday as high pressure begins to build back over the eastern Pacific.

Medford Weather:

Isolated afternoon and evening thunderstorms will persist through Tuesday evening, but then a dry, more typical summer pattern will set up with a thermal trough near the coast and a dry air mass inland. Temperatures will warm to near normal values.

Reno Weather:

A weak trough and residual moisture over California will allow for isolated afternoon thunderstorms through Monday with high temperatures remaining slightly below average. Temperatures warming to around average with drying conditions are expected for mid to late week.

San Francisco Weather:

A persistent upper level trough just off the west coast will maintain cooler than normal temperatures over inland areas through the start of the upcoming workweek. A gradual warming trend, along with dry weather conditions can be expected for the remainder of the week.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Unseasonably cool temperatures continue through the weekend with drier weather though a few mountain showers or thunderstorms are possible through Sunday. Dry and gradually warmer conditions will arrive mid-week with a cool down next week.

Hanford Weather:

Central California will see below normal temperatures and dry conditions due to a southwest flow aloft. As the flow aloft weakens, a warming trend with continued drying will exist for most of next week.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A weak upper level trough will persist along or just off the west coast for much of the week. Areas of night through morning low clouds and fog are expected across the coastal plain and in some valley locations. Daytime temperatures will be slightly below normal in most areas. Mid and high level moisture may move in at the end of the week or over the weekend possibly bringing some showers and thunderstorms to interior sections.

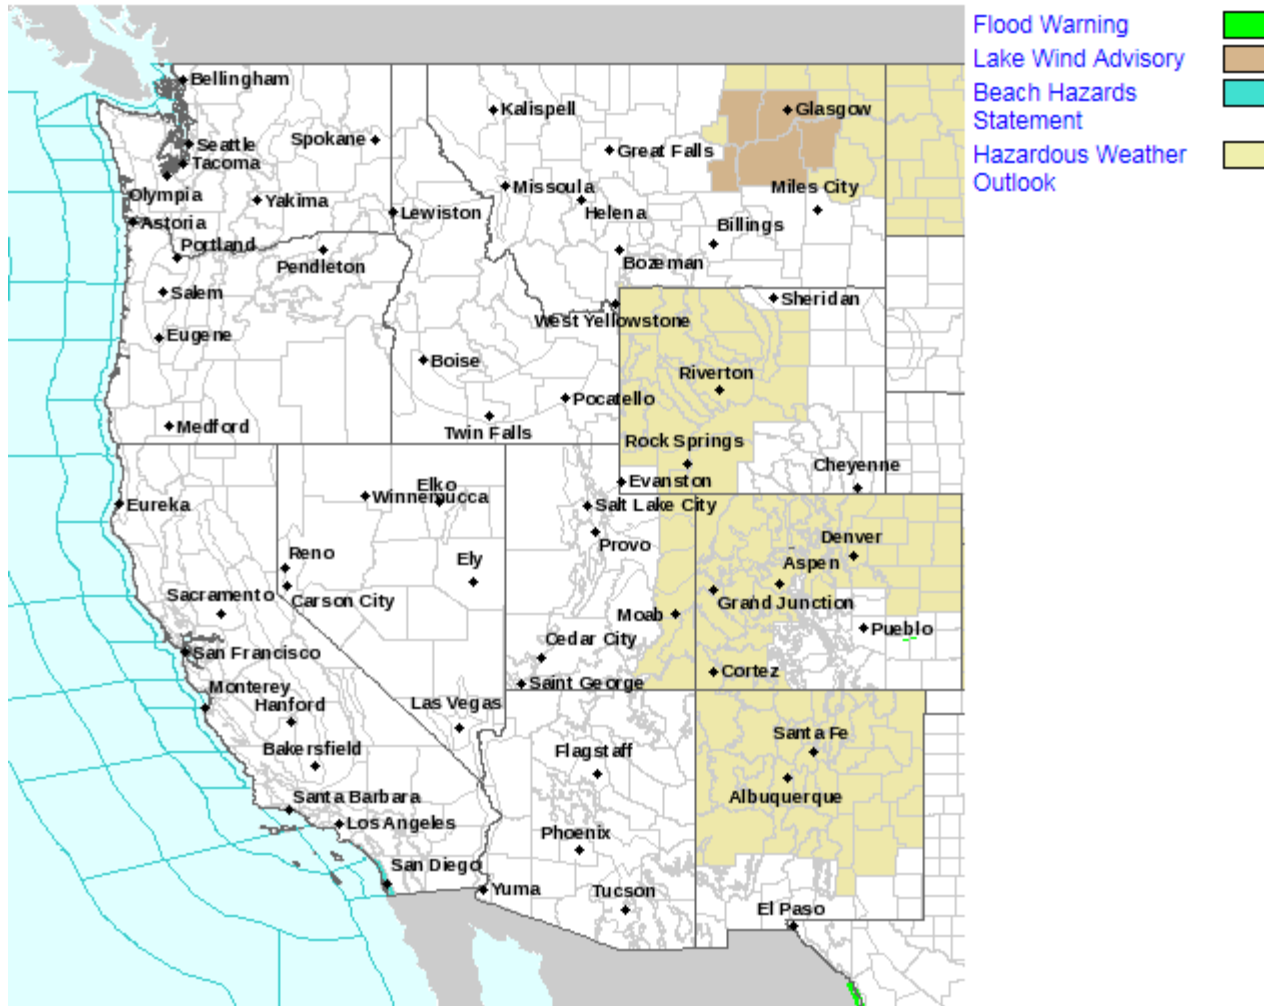

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Through Thursday, a weak trough of low pressure near the west coast will maintain dry southwest flow aloft and weak onshore lower level flow with high temperatures near to slightly below average and a marine layer depth slightly greater than average for early to mid-July with areas of night and morning low clouds and patchy fog extending into portions of the inland valleys at times. For Friday through next weekend, the broader circulation around developing Tropical Cyclone Dolores may bring an influx of moisture with warmer low temperatures, cooler high temperatures for inland areas and warmer high temperatures near the coast along with a chance of showers and thunderstorms.

Southeast California Weather:

Little change in the weather pattern is forecast the next several days. Dry weather with near normal temperatures are expected in southeast California. High temperatures will stay near seasonal normals through the latter part of the next work week.
